2021 Annual Diocesan Appeal:

This Sunday is Super Bowl Sunday! The NFL is inviting approximately 7,500 vaccinated healthcare workers to this Sunday's Super Bowl game to thank and honor them for their service during the pandemic.

A day like this Sunday should help to remind us to be thankful for our health. It is until we are unwell that we remember that having a healthy body and food to nourish it is so important. Remember, when the game is on the line and you need this touchdown or last-second field-goal, and you're praying to God that they make it, pray for the health of the teams and thank Him for ALL your blessings too.

*And thank you, for your participation in the **Annual Diocesan Appeal**. It's the Super Bowl of the Bishop's mission to serve his flock.*

Meditation:

Signs of God's Healing

There is a debate about whether the people whom Jesus healed were really possessed by the devil or were just mentally disturbed. That debate is utterly besides the point. These individuals were deeply troubled and Jesus healed them. His intent was to heal people both in body and soul. Most scripture scholars now agree that miracles were an important part of Our Lord's ministry and of the memory of that ministry in the early church. We simply cannot abandon them to please those who say miracles are impossible. The precise explanation of how these healings were accomplished is another matter and perhaps one that is also besides the point. Jesus did not work miracles to prove anything. Rather they were signs that God's healing love is at work in the world.

Once upon a time some doctors discussing whether prayer helped their patients. "Does it do any good," they asked, "for people to pray for those who are sick?" One group said "Well, it helps those who pray to feel that they're doing something for the sick person. But it really doesn't help the sick person at all." The other group said that they had the impression that prayer really had a positive effect on sick people. The first group said "That's scientifically impossible!" So they decided to try a "double blind" experiment on those who were recover from heart problems. They would have prayers said for some and not for the others to see what happened. The doctors
